LIFE-CHECK

Life-Check determines the wear history based on the torque on the spindle and activates the tool system.

MADE IN GERMANY

Life-Check advantages

- torque store of the sharp tool
- intuitive, self-explanatory operation
- uncomplicated & speedy commissioning
- revolutionary self-learning process
- no additional hardware needed
- no adjustment of the PLC program

Life-Check features

- avoid tool breakage
- significantly increased process reliability
- unambiguous increase in availability
- measurable reduction in tooling costs
- better utilization of cutting edges
- intelligent adaptation of the learned data
